

Peter F. Stanton Executive Chairman

October 17, 2024

Dear Shareholders:

The third quarter operating environment was quite dynamic with a significant, 800,000 plus, downward revision in jobs data, cooling inflation, and a bigger than expected rate move lower by the Federal Reserve. With expectations growing that inflation was under control and the job market was softening, the market anticipated a rate cut by the Fed and the longer end of the yield curve dropped over 100 basis points ("bps"). The 10-year treasury bond yield dropped from a recent peak in April of 4.70 percent to a recent low of 3.64 percent in mid-September. Market expectations for lower rates took hold and the Fed moved aggressively by lowering its Target Fed Funds rate 50 basis points to 5.00 percent, apparently signaling a shift in the Fed's policy focus from inflation to employment. Both the markets and the Fed are signaling more rate cuts into the future.

The Company's third quarter earnings came in slightly higher than second quarter levels, but that incremental improvement in earnings masked some positive underlying trends. Third quarter results included solid loan and deposit growth, lower wholesale borrowing levels, lower overall funding costs, higher loan yields and widening margin. Widening margin, combined with growth in average earning assets, helped propel net interest revenue higher by \$5.2 million, or 8.1 percent quarter-over-quarter. These improving fundamentals reflect solid execution and progress by the team, and are a welcome improvement in the earnings generation capacity of the balance sheet.

For the quarter, net income totaled \$11.9 million, up \$123,000, or 1.1 percent from second quarter levels and up \$1.8 million, or 18.1 percent from year ago performance. Earnings per share were \$4.75, up \$0.06, or 1.3 percent from the second quarter and up \$0.75 per share, or 18.5 percent from the third quarter of 2023. Return on assets held steady at 0.44 percent quarter-over-quarter and increased 8 bps year-over-year. While return on equity declined 5 bps quarter-over-quarter, this performance measure increased 63 bps year-over-year to 5.13 percent. Book value per share was up \$6.28, or 1.7 percent for the quarter and \$18.60, or 5.3 percent year-over-year.

While bottom line performance showed modest improvement, there were a number of fundamental drivers of performance that improved significantly. Loan yields were up 15 bps for the quarter and 43 bps year-over-year to 5.94 percent. While the cost of interest-bearing deposits rose during the quarter (up 9 bps to 2.69 percent), the cost of total interest-bearing liabilities declined 4 bps to 3.14 percent. This divergence is explained by the paydown of higher cost wholesale borrowings (outstanding balances

W.T.B. Financial Corp

down \$472 million to \$1.0 billion at quarter end). With loan yields up and total liability costs down, net interest margin widened 16 bps to 2.62 percent during the quarter. Wider margin (up 16 bps), and strong loan (up \$169 million) and deposit (up \$680 million) growth drove earning assets higher, and net interest revenue increased \$5.2 million, or 8.1 percent quarter-over-quarter to \$69.4 million. Solid growth in net interest revenue is the boost in balance sheet earning power we have been waiting to see.

With two significant one-time events in the second quarter impacting noninterest revenue and noninterest expense, quarter-over-quarter comparisons are difficult. Recall that in the second quarter, we recorded a roughly \$9 million gain on VISA stock and the \$3 million expense accrual for state taxes. For the third quarter, noninterest income decreased \$8.4 million, but year-over-year, noninterest income increased \$3.1 million, or 23.1 percent to \$16.7 million, reflecting primarily higher fiduciary revenue from our wealth management division. Similarly, noninterest expense quarter-over-quarter decreased \$3.3 million, but year-over-year increased \$3.3 million, or 5.2 percent to \$67.4 million, with most of that increase due to higher compensation expense.

There were some significant moves and positive trends in the balance sheet during the third quarter. Total deposits came back strong with balances increasing \$680 million, or 8.5 percent to \$8.6 billion, and of that growth, \$234 million was in noninterest-bearing demand accounts, which is to our overall benefit from a cost of funds perspective. Noninterest-bearing deposits now comprise 38 percent of total deposits, reflecting our significant book of commercial banking clients. That inflow of deposits helped fund a paydown of higher cost borrowings, which decreased \$472 million during the quarter to \$1.0 billion. Deposit inflows plus a \$76 million decline in investment securities helped fund growth in loans and our cash position. During the quarter, loans grew \$169 million, or 2.5 percent to \$6.9 billion and investible cash increased \$155 million to \$378 million. These balance sheet dynamics helped increase earning asset yields (up 11 basis points to 4.59 percent), lower overall cost of funds (down 4 bps to 2.14 percent) and widen margin (higher by 16 basis points to 2.62 percent).

Overall, assets increased \$264 million, or 2.4 percent to \$11.1 billion, while shareholders equity grew by \$13.8 million, or 1.5 percent quarter-over-quarter and \$42.7 million, or 4.9 percent year-over-year to \$921 million. Asset quality remained solid, with noncurrent loans totaling \$34 million, or 0.5 percent of total loans and classified loans totaling \$114.6 million, or 1.7 percent of total loans. The Bank's allowance for credit losses remined substantial at \$155.2 million, or 2.24 percent.

With regard to our share repurchase program, on February 27, 2024, the Board of Directors reauthorized a share repurchase plan for up to \$10.0 million of Class B common stock, which will be in effect over a twelve-month period. Common share repurchases under this plan, if any, may be made from time to time on the open market through broker dealers or in privately negotiated transactions, at the discretion of Company management. The extent to which the Company purchases shares and the timing of any such purchases will depend upon a variety of factors, including market conditions and relevant corporate considerations. The share repurchase program will

be conducted in a manner intended to comply with the safe harbor provisions of Rule 10b-18 under the Securities and Exchange Act of 1934. As of this date, we have repurchased 21,740 shares at an average cost of \$274.34 per share and total consideration of \$6.0 million. There is \$4.0 million of share repurchase authority left from the February 2024 authorization of \$10 million.

We have made much progress over the past two years navigating through the spike in rates and industry disruptions in the spring of 2023. While our financial performance has been below our standards, the team has continued to grow the business, reshape the balance sheet, improve earning power and execute across our strategic initiatives. Adapting to this new rate environment has required patience, but we believe our progress can accelerate from here, and the building that has gone on behind the scenes has progressed, despite a difficult operating environment. For example, in November, we will be opening a new, full service, financial center in Vancouver, Washington. We have been building out our Vancouver team for some time and are now ready to open up this new market. If you happen to live in the area, please come down and visit us after our grand opening on November 12th; the team will be pleased to show you around.

We say this often, but we really are grateful for your loyalty and support for the Company and all of our employees. Your trust in us makes all the good we do for our clients and the communities we serve possible. All of us here appreciate your confidence and we are hard at work building the future of the bank. We look forward to reporting out to you on our progress again next quarter.
